#### SCHOOL HISTORY

overnment
Secondary
School, Kubwa is
currently situated at its
permanent site in the
highbrow area phase 4
of the Kubwa satellite
town. The school was
originally established as
a Junior Secondary
School in the month of
June 1989. At that time, it
took off at a temporary
site of Local Education

Authority (LEA) in PW Kubwa. It then had teaching staff and non-teaching staff of twelve persons, seven teaching staff, three Librarians and two store keepers. That was how little the school took off from a humble beginning.

The school was meant to cater for children, students of the average civil servants and the natives of the land (the Gbaggyis) resident in Kubwa as a satellite town and her suburbs within the vicinity. Being the only government secondary school at the time, it strived to meet up with the absorption of the youths within the secondary school age – range. The school has managed through thick and thin over the years to stay afloat in the business of training and churning out students, some of who are doing well for themselves today in their different fields of endeavors in different parts of the world. This supports our aim of preparing them to becoming global citizen.

Gradually, the school kept on metamorphosing until it moved to its permanent site at phase 4 still in Kubwa. At this time, it ran the full stretch of both the junior classes and the senior classes in same school. At some point when the Babatunde Fafunwa (Babs Fafunwa) 6.3.3.4 system of education in Nigeria was adopted, the school again split into Senior and Junior secondary schools. At this point, it maintained just the senior secondary school section whose major responsibility was and still is to prepare students to write their WASSCE (West African Senior School Certificate Examination) upon completion of their secondary school (High School) education. This school is located in a high brow satellite town within Bwari Area Council, FCT Abuja.

In addition, the administrative headquarters that the school falls under is the Federal Capital Territory Authority (FCTA). The section that directly runs the affairs of the senior secondary schools in FCT is the Secondary Education Board (SEB).

ongratulations on your big day of graduation! It's a nostalgic feeling as I remember my student life in secondary school so many years ago. I am sure we all have mixed feelings on this day which is a blend of joy and sadness. On one hand you feel enthusiastic as you will be stepping into a completely new different world where you will find relatively more freedom than in a school life. While on the other hand you will feel sad as you have to depart from your school / classmates.

My dear friends the time has come to bid you all farewell with an open heart from this esteemed institution which protected you, cared for you, supported you and guided you all these years.

The school has given you the best academics, provided you with the necessary tools to improve your skills and elevated ethics and values in

lot of work goes into building a house: From the foundation to framing, to laying the blocks, roofing, wiring, and so on. The same thing applies to your life. Greatness don't just happen, it requires a lot of work. First, just like the architects, builders know that a building will not last long without a foundation, and that the strength and stability of a building depends on the stability of it's foundation, similarly you must know that the foundation upon which you build your life will determine If your life will be able to weather it's storm, as your journey through Life.

Government Day Secondary School Kubwa has given you a solid foundation, it's now left to you to start building upon this foundation individually. As you journey through your life, build your life on honesty, diligence, self control, comportment, aquired skills, good work, good habits, good attitude, character and lastly, above all, don't forget God.

Just as continuous assessment means assessing aspects of learning throughout thier course and then producing a final examination result from these assessments. It can be compared with a final or summative assessment, which only asseses the

learner at the end of the course. It is an ongoing process that measures a student's achievement in a course of study.

Your life is a course of study. Your success in

life will be the summative assessment of your efforts on a daily basis. As you journey through life, do not forget your C.A (you are great!)

uccess from the Oxford advanced dictionary defines the word as the fact that you have achieved something that you want and have been trying to do or get. Perseverance and hard work are essential to achieve success and one's desired goal.

According to physicians or physics philosophers around the globe; The law of conservation of time cycle states that the time which is inherent for any object l.e it's the time cycle (Time of existence) is saving constancy, Any action which is directed on changing of the time cycle causes a corresponding counteraction.

Some scientists call it the cycle of life but how does this apply to a secondary school student? Well as we all know time management is the main determinant on a students overall performance, application, and success. As stated earlier an object (The student) has a specific time cycle or schedule I.e 24hrs to a day inherent to him/her/it. Actions performed by the object aimed at affecting its time cycle causes a corresponding reaction.

In simple terms, however one uses his/her time determines one's result and performance. Therefore if one uses his/her time wisely puts in hard work coupled with severance that is the recipe to success whereas when wastes away

his/her time on distractions that results in failure and regret. I implore my fellow students to persevere and work harder to achieve

success.

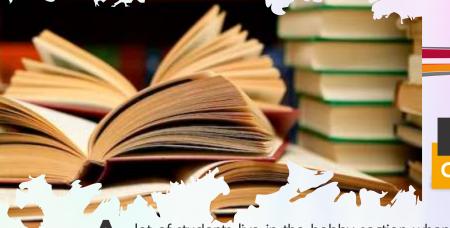

Lastly to my fellow graduates, I congratulate you on completing the first major hurdle or stepping stone in achieving success. So I once again advice you to not stop here but keep going and persevere as no matter how much one learns or how many hurdles one scales over, success knows no bounds as even a PhD holder remains a student of life and knowledge their watch word because knowledge is light.

## READING CAN IT REALLY BE A HOBBY?

lot of students live in the hobby section when they table "Reading" as one of their favorite things to do. We all know the truth, and that is that, most people don't find reading a pleasurable activity - and others don't believe they ever will. Some people are satisfied with "cramming" and consider themselves PRO. at it, others don't bother and completely rely on those given to the art of Cram.

But! Fellow students, i write this to tell you that reading can indeed become an exercise Ethan isn't strenuous.

So, "How can reading become a hobby instead of a task?"

- •The first step is getting into a good position when you want to read. You need to be sat when reading. Laying down is comfortable, but we admit it might get "too comfortable", so sit in an upright position, but make sure you're comfortable.
- •Run through a small position of the material to be studied: Much like when watching a movie; at first glance, the article still leaves you with questions so brush through it quickly.
- •Analyze the material slowly: Brushing through it gives you an outlook of what to expect and doing so leaves a few paragraphs and key words in your memory.

Therefore, going through the same article slowly and with a pen and jotter (notebook) nearby, you'll find that you're able to grasp the needed content and see where those key ideas lay.

- •Take little breaks: Don't make reading a boring exercise for yourself. It's supposed to be fun, regardless of what it is you're reading a History textbook, a Shakespearean novel or a Biology study guide. Taking little breaks of 3-5 minutes gives you the boost you need and a chance to stretch your legs.
- \*Remember, don't pick up your phone during this period. Keep it out of your study space! "Out of sight, out of mind", a wise Headgirl once said.
- •Set goals for yourself: If you're someone who has never shown prior interest to reading and you want to apply the advice stated herein, then take it slowly. Set time-oriented goals for yourself. You could push yourself to study diligently for 10-15 minutes before a well deserved rest. As the days go by and you start to see the benefits, do well

increase this time to 20 - or even 30 minutes, all as you deem fit.

From thereon, the task of setting goals with respect to your reading time is up to you completely.

•Lastly, remember reading \_can\_ be fun. Every subject must have at least one topic that appeals to you. Start with that - irrespective of how advanced it is.

Do all these and you can guarantee you'll come to enjoy reading - maybe even as much as I do.

Reading books that stir up the soul, and not the mind, is easy.

Reading books meant for the mind isn't. Be diligent, and have a wonderful session.

## PTA Chairman's

ongratulations to the 2022 Graduands!
